Preface

Introduction

1.	Principles of Vibration and Acoustics for Guitar Designers.....	1-2
1.1.	Sound and How We Hear.....	1-2
1.1.1.	What is sound?	1-2
1.1.2.	The ear.....	1-6
1.1.2.1.	The anatomy of the ear.....	1-6
1.1.2.2.	Roughness	1-9
1.1.2.3.	Masking	1-12
1.1.3.	Consequences for guitar designers of how we hear	1-15
1.1.4.	Section summary	1-16
1.2.	Simple harmonic motion.....	1-17
1.2.1.	Mathematical definition of simple harmonic motion	1-17
1.2.2.	Geometrical model of simple harmonic motion.....	1-17
1.2.3.	The period of simple harmonic motion.....	1-18
1.2.4.	An example of simple harmonic motion	1-18
1.2.5.	The energy embodied in simple harmonic motion.....	1-21
1.2.6.	Section summary	1-22
1.3.	Introduction to the mechanics of beams	1-24
1.3.1.	Stiffness of simple beams	1-24
1.3.2.	The mass of a simple beam	1-25
1.3.3.	Vibrating systems.....	1-25
1.3.4.	Section summary	1-26
1.4.	Resonance and vibration sensitivity	1-27
1.4.1.	Simple resonators	1-27
1.4.2.	The Helmholtz resonator	1-29
1.4.3.	Damped simple resonators	1-31
1.4.4.	Driven, damped simple resonators – strings driving soundboards.....	1-32
1.4.5.	The detailed behaviour of a simple driven resonator.....	1-38
1.4.6.	The Q-Factor	1-41
1.4.7.	Mechanical Impedance	1-43
1.4.8.	Impedance (mis)matching	1-44
1.4.9.	Impedance, admittance and the high performance guitar.....	1-45
1.4.10.	Beats.....	1-47
1.4.11.	Section Summary	1-48
1.5.	Vibrations in strings and the forces they exert.....	1-49
1.5.1.	Types of waves in strings – frame of reference	1-49
1.5.2.	Transverse waves in strings	1-50
1.5.3.	Wave partials and harmonicity	1-51
1.5.4.	Waves in “ideal” strings.....	1-52
1.5.5.	Forces on the terminations of an ideal string	1-53
1.5.6.	Real strings	1-57
1.5.7.	Plucking at places other than the centre	1-59
1.5.8.	Forces exerted by a string on a soundboard	1-62
1.5.9.	Strings with bending stiffness	1-65
1.5.10.	Section summary	1-70
1.6.	Introduction to vibrations of bars and plates – strings driving soundboards	1-71
1.6.1.	Vibrations of bars	1-71
1.6.2.	Vibrations of plates with free edges	1-72
1.6.3.	Vibrations of flat plates fixed around their edges.....	1-73
1.6.4.	Guitar vibration modes excited by the string forces	1-75
1.6.5.	Vibrations of curved plates (spherical shells)	1-77
1.6.6.	Section Summary	1-79
1.7.	Sound radiation from a guitar	1-81
1.7.1.	How sound is radiated by a guitar.....	1-81
1.7.2.	Monopole sound radiation and specific mobility.....	1-89
1.7.3.	Monopole mobility and the frequency response curve	1-91
1.7.4.	The anatomy of a plucked note	1-92
1.7.5.	Sound radiation from the guitar cavity at middle frequencies.....	1-93

1.7.6.	Sound radiation and directivity	1-95
1.7.7.	Section summary	1-100
2.	Analytical Guitar Models and their Use.....	2-2
2.1.	Coupled resonators and simple low frequency guitar models	2-2
2.2.	Coupled resonators.....	2-3
2.2.1.	Two mass coupled resonator	2-4
2.3.	2-DOF model of a guitar's low frequency response	2-9
2.3.1.	Low frequency response of a guitar with a stiff back.....	2-9
2.3.2.	Two mass coupled resonator model for guitars	2-10
2.3.3.	Using the 2-DOF model to determine f_h	2-13
2.3.4.	Direct determination of the Helmholtz frequency	2-14
2.3.5.	Use of the 2-DOF model in the workshop	2-15
2.3.6.	Using the 2-DOF model for guitars with live backs	2-17
2.3.7.	Some unusual features of guitar shaped cavities.....	2-17
2.3.8.	"Live back" guitar low frequency response	2-18
2.3.9.	Coupled top plate and back plate guitar model	2-19
2.3.10.	Target values for the main top and main air resonances	2-24
2.3.11.	Investigative modelling – working in the frequency domain	2-25
2.3.12.	Empirical adjustment of plate frequencies.....	2-26
2.3.12.1.	Top response to small perturbations in mass.....	2-27
2.3.12.2.	Guitar response to side mass.....	2-28
2.4.	Simulation of a guitar's frequency response	2-31
2.4.1.	A 4-DOF model of low frequency guitar function	2-32
2.4.1.1.	4-DOF model sensitivity analysis	2-38
2.4.1.2.	4-DOF model and "live" backs.....	2-40
2.4.2.	The behaviour of superimposed simple sound sources	2-42
2.4.3.	Combining the 4-DOF model with superimposed simple sources.....	2-46
2.5.	Coupling of strings to soundboards	2-50
2.6.	Chapter Summary	2-51
3.	The Design Objective - The Perfect Guitar.....	3-2
3.1.	Playability	3-2
3.1.1.	Plucking hand feel	3-3
3.1.2.	Fretting hand feel	3-4
3.1.2.1.	Scale length	3-4
3.1.2.2.	Tuneability	3-5
3.1.2.3.	Action.....	3-6
3.1.2.4.	String height at the nut	3-9
3.1.2.5.	Relief	3-9
3.1.2.6.	Fretboard crown	3-11
3.1.2.7.	Neck profile/nut width	3-12
3.1.2.8.	Fret types	3-13
3.1.2.9.	Neck finish	3-14
3.1.2.10.	Neck to body joint position; cutaways.....	3-14
3.1.2.11.	Number of frets	3-15
3.2.	Musicality.....	3-16
3.2.1.	Consonance and dissonance.....	3-16
3.2.1.1.	Experimental demonstration of consonance and dissonance.....	3-16
3.2.1.2.	The consonance of intervals	3-18
3.2.1.3.	A brief history of scales.....	3-19
3.2.1.4.	Tuning gap (between what you tune to and what you'd like to hear)	3-21
3.2.1.5.	Tuning error (between what you tune to and what your guitar plays)	3-22
3.2.1.6.	Achieving pitch accuracy	3-23
3.2.1.7.	Dealing with inharmonicity	3-23
3.2.2.	The acoustic response characteristics of a guitar.....	3-24
3.2.2.1.	A perfect frequency response?	3-24
3.2.2.2.	Guitar performance factors: "Volume and tone"	3-29
3.2.2.3.	Performance factor nomenclature	3-29
3.2.2.4.	Tonal qualities of a Dreadnought guitar used for flat picking	3-33
3.2.2.5.	Tonal qualities of a steel string guitar for finger style playing	3-34
3.2.2.6.	Tonal qualities of a classical guitar.....	3-35
3.2.2.7.	Tonal qualities of a flamenco guitar (<i>flamenco blanca</i>)	3-38
3.3.	Concluding remarks.....	3-41

4.	Component Design	4-2
4.1.	Wood as an organic material	4-2
4.1.1.	The composition of wood	4-3
4.1.2.	The annual cycle	4-5
4.1.3.	Dealing with moisture	4-5
4.1.4.	Dealing with runout	4-8
4.1.5.	Storing wood	4-11
4.2.	Guitar woods	4-12
4.2.1.	Top woods	4-12
4.2.2.	Back and side woods	4-15
4.2.3.	Neck woods	4-15
4.2.4.	Brace woods	4-16
4.2.5.	Fretboard woods	4-17
4.2.6.	Bridge woods	4-17
4.2.7.	Woods for other components	4-18
4.3.	Wood properties that matter	4-18
4.3.1.	The sound radiation coefficient	4-19
4.3.2.	The damping factor	4-21
4.3.3.	Measuring wood properties	4-21
4.3.3.1.	Measurement of Q	4-21
4.3.3.2.	Measurement of logarithmic decrement	4-23
4.3.3.3.	Potential difficulties	4-26
4.3.3.4.	Long grain damping vs. cross grain damping	4-28
4.3.3.5.	Tap testing for " Q "	4-29
4.3.4.	Conditioning wood	4-29
4.3.5.	Section summaries, sections 4.1, 4.2 and 4.3	4-30
4.4.	Design of braces and bracing systems	4-31
4.4.1.	Bending stiffness	4-31
4.4.2.	Brace design criteria	4-32
4.4.3.	Calculating the second moment of area of a brace	4-35
4.4.4.	Measurement of Young's modulus E for brace material	4-38
4.4.5.	Determination of soundboard flexural rigidity	4-40
4.4.6.	Carbon fibre reinforced braces	4-45
4.4.6.1.	Designing Composite Braces	4-46
4.4.6.2.	Balancing brace stiffness to panel stiffness	4-48
4.4.7.	Stress limits for braces	4-48
4.4.8.	Top bracing layout - guidelines	4-51
4.4.9.	Back bracing	4-52
4.4.10.	Section summary	4-53
4.5.	Design of plates	4-55
4.5.1.	Waves in plates	4-55
4.5.2.	The tap tone method of establishing wood properties	4-57
4.5.3.	Establishing the target plate thickness	4-60
4.5.4.	Sensitivity to long and cross grain stiffness variations	4-64
4.5.5.	Panel design decisions	4-64
4.5.6.	Section summary	4-65
4.6.	Body shapes and the design of other components	4-66
4.6.1.	Bridge design	4-66
4.6.1.1.	The bridge as a distributor of string loading	4-66
4.6.1.2.	Positioning the bridge on X-braced guitars	4-67
4.6.1.3.	Bridge mass and stiffness	4-68
4.6.1.4.	Steel string bridge detail design	4-69
4.6.1.5.	The bridge plate	4-71
4.6.1.6.	Classical guitar bridges	4-71
4.6.2.	Linings	4-72
4.6.3.	End blocks	4-72
4.6.4.	Cutaways	4-73
4.6.5.	Neck joint	4-74
4.6.6.	Fretboard - fret spacing	4-76
4.6.7.	Neck cross sectional shape	4-77
4.6.8.	Truss rods	4-79
4.6.9.	The nut	4-80
4.6.10.	Headstock	4-81

4.6.11.	Body shape	4-84
4.6.11.1.	Size and shape	4-84
4.6.11.2.	Body shape proportions	4-86
4.6.11.3.	Designing body shapes	4-87
4.6.12.	Neck angle, neck relief and top curvature	4-89
4.6.12.1.	The effect of action adjustments	4-89
4.6.12.2.	The effect of fretboard relief	4-89
4.6.12.3.	The effect of soundboard doming	4-92
4.6.13.	Section summary	4-96
4.7.	Intonation	4-97
4.7.1.	A first source of intonation errors	4-97
4.7.2.	A second source of intonation error	4-99
4.7.2.1.	Fixing intonation errors due to body resonances	4-99
4.7.2.2.	Resonance shifting	4-99
4.7.2.3.	Empirical nut and saddle compensation	4-101
4.7.2.4.	A simple intonation fix	4-104
4.7.3.	Compensation for a high performance guitar	4-104
4.7.3.1.	Measuring a string's longitudinal stiffness	4-106
4.7.3.2.	Calculating the change in path length as the string is fretted	4-110
4.7.3.3.	The effect of string bending stiffness on intonation error	4-118
4.7.4.	Compensation without most of the mathematics	4-119
4.7.5.	Compensation with even less mathematics	4-120
4.7.6.	Nut compensation and the neck layout	4-121
4.7.7.	Section summary	4-122
4.8.	The visual aesthetic	4-123
5.	Layout Procedure	5-2
5.1.	Drafting the layout of a steel string guitar	5-2
5.2.	Drafting the layout of a classical guitar	5-5
5.3.	Section summary	5-7
AI 1.	Technical note on collecting spectrographic data	AI-1
AI 2.	Using Chladni's technique to visualise vibration modes	AI-5
AI 3.	Collecting Monopole mobility data	AI-7
AII 1.	Deflection of the soundboard under oscillating longitudinal string forces	AII-1
AII 2.	4 Degree of Freedom model of low frequency guitar function	AII-5
AII 3.	Fretboard Curvature	AII-11
AIII 1.	Frequency look-up table	AIII-1
AIV 1.	Bending waves on plates	AIV-1
AV 1.	Sources of residual intonation errors, saddle-only compensation	AV-1
AVI 1.	Set-up and Performance Parameters of Guitars	AVI-1

Preface

1.	Introduction.....	1-2
2.	A Brief Review of Assembly Systems	2-2
2.1.	Free assembly methods	2-3
2.2.	Constrained assembly methods	2-4
3.	Our Approach to Building	3-2
3.1.	Our building system	3-2
3.1.1.	The outside mould	3-5
3.1.2.	The use of dishes and go-bar decks	3-6
3.1.3.	The bolt-on neck	3-7
3.1.4.	Order of construction	3-9
3.1.5.	Assembly flow chart.....	3-9
4.	Workshop, Tools, Equipment and Jigs.....	4-2
4.1.	The workshop and humidity control	4-2
4.2.	Stationary machinery.....	4-4
4.3.	Hand power tools	4-5
4.4.	Hand edge tools.....	4-5
4.4.1.	Standard bench planes.....	4-7
4.4.2.	Block planes	4-9
4.4.3.	Finger planes	4-10
4.4.4.	High angle planes.....	4-10
4.4.5.	Scrapers	4-11
4.4.6.	Shaves.....	4-11
4.4.7.	Chisels.....	4-11
4.4.8.	Saws	4-13
4.4.9.	Rasps, microplanes and files	4-13
4.4.10.	Sanding blocks.....	4-13
4.5.	Sharpening tools and process	4-14
4.6.	Measuring instruments and marking tools.....	4-16
4.7.	Clamps	4-16
4.7.1.	Spring clamps.....	4-16
4.7.2.	F - clamps	4-16
4.7.3.	G - clamps	4-16
4.7.4.	Instrument maker's clamps	4-16
4.7.5.	Trigger action clamps.....	4-17
4.7.6.	Parallel screw clamps	4-17
4.8.	Special tooling, fixtures and jigs	4-17
4.8.1.	Body shape template	4-17
4.8.2.	Body mould	4-19
4.8.3.	Go-bar deck	4-25
4.8.4.	Dished work boards	4-26
4.8.5.	Side bending equipment.....	4-29
4.8.6.	Binding ledge routing machine	4-35
4.8.7.	Panel joining fixture.....	4-40
4.8.8.	Bench accessories	4-40
4.8.8.1.	Bench hooks.....	4-40
4.8.8.2.	Shooting board	4-40
4.8.8.3.	Panel planing board	4-43
4.8.8.4.	Thickness gauge	4-43
4.8.8.5.	Neck carving horse.....	4-43
4.8.9.	Routing aids	4-43
4.8.9.1.	A custom fence for routing bridges	4-45
4.8.9.2.	A trammelling router base for circle cutting	4-45

4.8.9.3.	A simple router table	4-45
4.8.9.4.	Rectangular work board	4-45
4.8.9.5.	Bridge routing jig	4-47
4.8.9.6.	Body mortise routing fixture	4-47
4.8.9.7.	Brace bottom curve routing fixture	4-49
4.8.10.	Neck bolt drilling jig	4-49
4.8.11.	Neck tapering fixture	4-49
4.8.12.	Classical headstock barrel boring jig.....	4-49
4.8.13.	Fretboard caul.....	4-50
4.8.14.	String spacing tool for nut layouts	4-51
4.9.	Glues and general gluing practice.....	4-52
4.9.1.	Types of glue and their uses	4-52
4.9.2.	Gluing practice	4-54
4.10.	Finishes	4-55
4.11.	Craftsmanship counts	4-55
5.	The Neck	5-2
5.1.	Building the neck blank	5-4
5.2.	Cutting the truss rod slot.....	5-9
5.2.1.	Marking out the truss rod slot	5-9
5.2.2.	Routing the truss rod slot	5-9
5.3.	Cutting the neck tenon.....	5-11
5.3.1.	Marking out the neck tenon	5-11
5.3.2.	Making the cuts.....	5-13
6.	Joining and Thicknessing the Panels	6-2
6.1.	Squaring and surfacing the panels	6-2
6.2.	Tap testing the panels.....	6-7
6.3.	Joining the panels	6-8
6.3.1.	Shooting the edges – top and back panels	6-8
6.3.2.	Joining the panels.....	6-10
6.4.	Rosette making	6-11
6.4.1.	A traditional rosette for a steel string guitar	6-11
6.4.1.1.	Making the rosette former	6-11
6.4.1.2.	Squaring the ends of the shell segments	6-11
6.4.1.3.	Assembling the shell ring	6-13
6.4.1.4.	Inlaying the rosette into the soundboard	6-15
6.4.1.5.	Levelling the rosette	6-20
6.4.2.	A contemporary rosette for steel string or classical guitar	6-20
6.4.2.1.	Producing a burl slice.....	6-20
6.4.2.2.	Routing the rosette blank	6-23
6.4.2.3.	Inlaying the rosette into the soundboard	6-23
6.5.	Final thicknessing.....	6-27
6.6.	Sound hole reinforcement patch	6-29
6.6.1.	Assembling and shaping the patch blank	6-29
6.6.2.	Gluing down the sound hole patch	6-29
6.7.	Cutting out the sound hole	6-31
6.7.1.	Tapering the inside edge of the sound hole	6-31
6.8.	Thicknessing the sides	6-31
7.	Making Braces.....	7-2
7.1.	Preparing back braces and conventional X-braces for tops	7-3
7.1.1.	Machining the curve on the base of the brace	7-5
7.1.1.1.	Router method.....	7-5
7.1.1.2.	Hand tool method	7-7
7.2.	Making lattice bracing	7-7
7.3.	Making falcate braces	7-10
7.3.1.	Preparing the laminates	7-10
7.3.2.	Bending the laminates	7-11
7.3.3.	Trimming the braces to size	7-13
7.3.4.	Tertiary braces and sound hole bracing	7-13
7.3.5.	Upper transverse brace	7-13
7.3.6.	The bridge plate	7-13

8.	Bending the Sides.....	8-2
8.1.	Preparing the sides for bending	8-2
8.2.	Using a bending iron	8-4
8.3.	Using a side bending machine	8-6
8.4.	Bending a Venetian cutaway	8-8
8.5.	Fitting the sides to the mould.....	8-12
8.5.1.	For a non-cutaway guitar.....	8-12
8.5.2.	For a cutaway guitar	8-12
9.	Making the End Blocks and Linings.....	9-2
9.1.	Making the tail block.....	9-2
9.2.	Making the standard bolt-on head block	9-4
9.3.	Making the bolt-on, bolt-off head block for a Venetian cutaway	9-5
9.4.	Making the linings	9-7
9.4.1.	Preparing top linings	9-7
9.4.2.	Preparing back linings	9-9
9.5.	Making side splints	9-10
9.6.	Making the mass support blocks.....	9-11
10.	Assembling the Sides, End Blocks and Linings.....	10-2
10.1.	Gluing in the end blocks.....	10-2
10.1.1.	For a non-cutaway guitar.....	10-2
10.1.2.	For a cutaway guitar	10-3
10.2.	Fitting the linings	10-5
10.2.1.	Marking the reference lines.....	10-5
10.2.2.	Installing the laminated top linings	10-7
10.2.3.	Fitting the tail block splint	10-9
10.2.4.	Marking out and trimming the side profile to take the back panel.....	10-11
10.2.5.	Installing the back linings	10-11
10.2.6.	Fitting the side splints	10-13
10.2.7.	Marking out and trimming the side profile to take the top panel.....	10-13
11.	Bracing the Panels	11-2
11.1.	Bracing the back	11-2
11.1.1.	Radially braced "Live" back	11-3
11.1.1.1.	Installing the marriage strip	11-3
11.1.1.2.	Shaping the marriage strip	11-5
11.1.1.3.	Letting in the transverse braces	11-5
11.1.1.4.	Gluing in the braces	11-5
11.1.1.5.	Scalloping the back braces	11-7
11.1.2.	Ladder braced back	11-9
11.2.	Bracing the top	11-11
11.2.1.	Bracing styles	11-11
11.2.2.	X-braced top.....	11-14
11.2.2.1.	Layout the brace positions.....	11-16
11.2.2.2.	Bridge plate and upper transverse brace	11-16
11.2.2.3.	Fitting the X-braces.....	11-18
11.2.2.4.	The upper and lower face braces	11-20
11.2.2.5.	The finger braces	11-20
11.2.2.6.	Carving the braces	11-20
11.2.2.7.	Carving the finger braces and face braces	11-22
11.2.2.8.	Carving the X-joint.....	11-22
11.2.2.9.	Scalloping the outboard ends of the braces.....	11-22
11.2.2.10.	Tapering the braces.....	11-22
11.2.2.11.	The linen patch	11-26
11.2.2.12.	The sound hole braces	11-26
11.2.2.13.	Note on J45 back bracing	11-26
11.2.2.14.	Note on post-finishing brace tuning	11-26
11.2.3.	Fan braced top.....	11-28
11.2.3.1.	Layout the brace positions.....	11-30
11.2.3.2.	The fan braces.....	11-32
11.2.3.3.	Arching the bottoms of the braces.....	11-32
11.2.3.4.	Making the bridge plate	11-32
11.2.3.5.	Rebating the fan braces	11-34

11.2.3.6.	Gluing on the bridge plate	11-34
11.2.3.7.	Gluing on the fan braces	11-34
11.2.3.8.	Carving the fan braces	11-34
11.2.3.9.	Gluing on the closing bars and twin lower transverse braces	11-36
11.2.3.10.	Gluing on the upper transverse brace(s)	11-36
11.2.3.11.	Shaping the closing bars and transverse braces	11-36
11.2.3.12.	A note on back bracing for Fleta style guitars.....	11-38
11.2.3.13.	Note on post-finishing brace tuning	11-38
11.2.4.	Lattice braced top.....	11-39
11.2.4.1.	Laying out the lattice position	11-41
11.2.4.2.	Gluing down the lattice	11-41
11.2.4.3.	Carving the lattice.....	11-43
11.2.4.4.	Overlaying the lattice with carbon strands	11-45
11.2.4.5.	Adding the final braces	11-45
11.2.4.6.	Note on back bracing.....	11-45
11.2.5.	Falcate braced top for a 12 th fret neck joint steel string guitar	11-47
11.2.5.1.	Laying out the bridge plate position	11-48
11.2.5.2.	Drill the bridge pins holes.....	11-49
11.2.5.3.	Glue down the bridge plate and primary braces.....	11-49
11.2.5.4.	Secondary, tertiary and sound hole bracing	11-52
11.2.5.5.	Shaping the braces	11-52
11.2.5.6.	Overlaying the bracing with carbon strands	11-52
11.2.5.7.	The upper transverse brace	11-52
11.2.5.8.	Note on back bracing for falcate braced guitars	11-55
12.	Assembling the Top, Back and Sides	12-2
12.1.	Final shaping of the sides' top and back edges	12-2
12.2.	Fitting the back panel	12-4
12.3.	Fitting the top panel	12-6
12.4.	Gluing the back panel to the sides	12-11
12.5.	Checking the neck geometry.....	12-13
12.6.	Gluing the soundboard to the sides.....	12-16
12.7.	Thinning the edges of the top panel	12-18
13.	Binding and Purfling.....	13-2
13.1.	Making the bindings.....	13-2
13.2.	Cutting the binding and purfling rebates.....	13-6
13.2.1.	Planning the binding and purfling.....	13-6
13.2.2.	Cutting the stepped rebate	13-6
13.3.	Bending and fitting the bindings and purfling	13-9
13.4.	Applying the binding and purfling	13-11
13.5.	Levelling the bindings	13-15
13.6.	Note on fitting shell purfling.....	13-17
13.7.	Fitting the tail strip.....	13-18
13.7.1.	Making the tail strip	13-18
13.7.2.	Chiselling the tail strip channel.....	13-18
14.	The Neck, Part 2; Fitting and Preliminary Shaping	14-2
14.1.	Setting up the guitar in the holding fixture.....	14-2
14.2.	Routing the body mortise	14-5
14.3.	Fitting the neck.....	14-5
14.3.1.	Adjusting the tenon for width	14-5
14.3.2.	Trimming the tenon to length and depth.....	14-7
14.3.3.	Correcting the yaw angle.....	14-7
14.3.4.	Correcting the pitch angle.....	14-7
14.3.5.	Drilling the mortise for the bolt bar	14-11
14.4.	Drilling the holes for the head block bolts	14-13
14.5.	Counterboring the head block	14-13
14.6.	Drilling the bolt holes in the neck	14-16
14.7.	Preliminary shaping of the neck.....	14-18
14.7.1.	Establishing the longitudinal thickness taper	14-18
14.7.2.	Thickening the headstock	14-18
14.7.3.	Blending the head/neck curves.....	14-20
14.7.4.	Preliminary carving of the heel	14-20

15.	Making the Fretboard	15-2
15.1.	Preparing the fretboard blank	15-3
15.2.	Cutting the fret slots.....	15-3
15.2.1.	Fret slot spacing.....	15-3
15.2.2.	Low technology fret slotting	15-4
15.2.3.	Higher technology fret slotting	15-6
15.3.	Machining the nut ledge	15-6
15.3.1.	Nut ledge for a fully compensated nut	15-8
15.3.2.	Nut ledge with no nut compensation	15-8
15.4.	Crowning the fretboard	15-10
15.5.	Tapering the fretboard	15-11
15.6.	Fretting.....	15-11
15.6.1.	Choice of fret wire	15-12
15.6.2.	Preparing the fretboard for fretting	15-12
15.6.3.	Pressing in frets	15-13
15.6.4.	Hammering in frets.....	15-15
15.7.	Trimming the body end of the fretboard	15-15
16.	The Bolt-On, Bolt-Off Neck Joint	16-2
16.1.	Routing the neck extension pocket	16-4
16.2.	Re-establishing the truss rod groove in the neck extension	16-7
16.3.	Fitting the T-nuts to the neck extension	16-7
16.4.	Special requirements for the bolt-on bolt-off neck for classical guitars	16-9
17.	Making the Adjustable Truss Rod	17-2
17.1.	The single acting truss rod.....	17-2
17.1.1.	Making the adjusting nut.....	17-3
17.1.2.	Making the stop block	17-5
17.1.3.	Making the truss rod.....	17-5
17.2.	The double acting truss rod	17-10
18.	The Neck Part 3; The Headstock, Fretboard Gluing, Final Carving and Heel Cap ..	18-2
18.1.	Adding the ears.....	18-2
18.2.	Making the headstock laminate	18-2
18.3.	Gluing the headstock laminate	18-3
18.4.	Shaping the headstock.....	18-3
18.5.	Fitting the tuning machines	18-7
18.6.	Gluing on the fretboard	18-9
18.7.	Shaping the neck	18-11
18.7.1.	Squaring the neck	18-11
18.7.2.	Drafting the cross sectional profile of the neck	18-11
18.8.	Fitting the heel cap.....	18-18
18.9.	Installing the fret markers	18-18
18.9.1.	Final fitting of the standard neck to the body	18-21
19.	Finishing.....	19-2
19.1.	Surface preparation	19-2
19.2.	Grain filling	19-4
19.2.1.	Using a traditional oil-based grain filler.....	19-4
19.2.2.	Using an epoxy fill	19-6
19.2.3.	A note on sanding technique	19-8
19.3.	Finish application	19-9
19.3.1.	Equipment set up and technique.....	19-9
19.3.2.	Spraying pattern and schedule	19-9
19.4.	Sanding and buffing.....	19-11
19.5.	French polishing a guitar top.....	19-13
19.6.	Advanced shellac pore-fill and finish	19-14
19.6.1.	The shellac mix	19-15
19.6.2.	The application pad	19-15
19.6.3.	Hardware and abrasives	19-15
19.6.4.	The process	19-16
19.7.	Assembling the neck and body	19-17

20.	The Bridge and Saddle	20-2
20.1.	The bridge: requirements	20-2
20.2.	Construction of a contemporary bridge for a classical guitar	20-6
20.2.1.	Gluing on a classical guitar bridge.....	20-10
20.3.	Construction of a contemporary bridge for a steel string guitar	20-14
20.3.1.	Gluing on a steel string guitar bridge	20-17
20.3.2.	Routing a saddle slot with the bridge glued down.....	20-19
20.4.	Final detailing of the bridge	20-19
21.	Fitting the Tuners, Nut and Saddle	21-2
21.1.	Tuner requirements	21-2
21.2.	Fitting sealed tuners on a steel string guitar.....	21-2
21.3.	Fitting slot head tuners on a classical guitar	21-4
21.4.	Fitting planetary pegs on a neo-classical guitar.....	21-5
21.5.	The nut.....	21-6
21.5.1.	The nut blank	21-6
21.5.2.	Machining the compensated nut	21-8
21.5.3.	Fitting the nut.....	21-8
21.6.	The saddle	21-11
21.6.1.	Making the saddle	21-11
21.6.2.	Compensating the saddle	21-13
21.6.3.	Compensating a conventional saddle.....	21-13
22.	Adjustments	22-2
22.1.	Final string set-up – relief and action	22-2
22.2.	Trouble shooting the string set-up	22-2
22.2.1.	Rattles only on open strings.....	22-3
22.2.2.	Rattles that persist over most of the fretboard	22-3
22.2.3.	Rattles on particular frets	22-3
22.2.4.	Rattles on a range of lower frets.....	22-3
22.2.5.	Fret dressing	22-4
22.2.6.	Removing frets	22-5
22.2.7.	Rattles on a classical guitar D (4 th) string	22-5
22.2.8.	Buzz on the 4 th string of a classical guitar	22-6
22.2.9.	Deadness on a classical guitar G (3 rd) string.....	22-6
22.2.10.	Deadness on particular fretted notes.....	22-6
22.3.	Trimming body resonances.....	22-6
22.3.1.	Adjusting the top main resonance.....	22-7
22.3.1.1.	Using side masses.....	22-8
22.3.1.2.	By adjusting the back resonant frequency	22-8
22.3.1.3.	By adjusting the cavity resonant frequency.....	22-8
22.3.1.4.	By adding mass to or removing mass from the top	22-8
22.3.2.	Adjusting the cavity resonance.....	22-9
22.3.3.	Adjusting the back resonance.....	22-9
22.3.4.	Other annoying resonances.....	22-9
23.	Reflections.....	23-2
Appendix I		
A1 1.	The shipwright's compass	A1 1-1
Appendix II		
A2 1.	Fret spacing for common scale lengths	A2 1-1
